

Fact Sheet:

Lower Garden District / Central Business District Recovery Road Repairs

City of New Orleans
Department of
Public Works

Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

Project Facts:

Phase I: Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of \$66M. The total cost of Phase I repairs completed in the Lower Garden District/Central Business District area totaled approximately \$330,000.

Phase II: The Lower Garden District/Central Business District Recovery Roads program will include multiple construction repair projects with a total estimated value of approximately \$ 1.2 M.

Sidewalk repairs in the Lower Garden District were completed in the summer of 2012.

Design of the future waterline replacements and pavement patching in the Central Business District are currently underway and are being closely coordinated with the Sewerage and Water Board of New Orleans. Construction is currently scheduled to begin in early 2015 and will last through early 2016. The Sewerage and Water Board of New Orleans will complete subsurface utility line improvements prior to the Department of Public Works' road repairs.

What to expect during construction:

Residents and businesses in Lower Garden District/Central Business District should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. Burk Klenpeter Engineers is the designer of record in the Lower Garden District/Central Business District area. The construction contract for CBD repairs will be released for public bid in fall 2014.
